Company

Solar Street Lighting System Model : USL24L

USL Solar Street lighting system is an ideal lighting system for illumination of streets, squares and cross roads located in areas that need uniform distribution of light.

External power grid source is not required. The fully integrated system combines the latest and most innovative technologies available, providing years of convenient and trouble free lighting day after day.

Each Designed System is fully assembled and factory tested. USL Solar has a wide range of Solar Street lights, for different lighting applications.

"PICTURES FOR ILLUSTRATIVE PURPOSE ONLY"

MODEL	USL24L
SPV Module Type	Mono / Poly Crystalline Silicon
SPV Module Array (min)	2pcs X 40Wp or 1pcs X 80Wp
Battery type	LMLA
Battery capacity (min)	1pcs X 12V/75Ah
Solar Charge controller	12V/5A
Number of Luminaries*	One
Lamp type	PURE WHITE LEDs
Color Temperature	5500k-6500k
Typical Lamp Life	50000 Hrs
Module Mounting Structure type	Pole Mount
Pole Length in meters	5

*2pcs X USL12L Luminary in lieu of 1pcs X USL24L Luminary also available

Features:-

- Automatic dusk to dawn controller (DTDC)
- Highly efficient charge controller
- Weather proof luminaries
- Adequate protections
- Battery Box with Locking provisions
- Unmanned Operation
- Good Visibility, Low Glare
- Low Insect Attraction Ratio
- No Bulb Replacement for Life
- Economical
